

# invisiFRAME

**Kit Includes:**

- Protection Film Kit
- 1 - 8ml XPEL Installation Gel
- 1 - 16" x 16" Edgeless Microfiber Towel
- 1 - Application Squeegee

**Pre Application Steps:**

- Clean the bike, your hands, and the workspace. Degrease the bike surface thoroughly using an all purpose style cleaner.
- Identify the the film layout using the second page key.

**Application Instructions:**

- Spray the fitting solution generously on the area of the bike to be protected. If you run out of fitting solution, use Johnson & Johnson baby shampoo mixed at a ratio of 2ml to 32oz of water.
- Spray your fingers, then peel off the required shape and spray the adhesive side thoroughly.
- Apply the shape to the bike part and slide it into position. Spray more fitting solution on the top surface to assist with the squeegee.
- Using the provided squeegee, start from the center and work outwards to remove moisture, ensuring overlapping strokes.
- Repeat these steps for the remaining shapes. Allow to set for 24 hours, then press down all edges firmly.

**Application Instructions:**

- Perform application at temperatures above 64°F (18°C).
- While wet, parts can be repositioned or even placed back on the sheet if needed.
- The fitting solution prevents immediate adhesion to the bike.
- After 24 hours, press down the edges with your fingers and thumbs.
- For quicker application, use an Isopropyl Alcohol and Water mixture, 4:1 ratio). Spray on both sides of the film and squeegee.

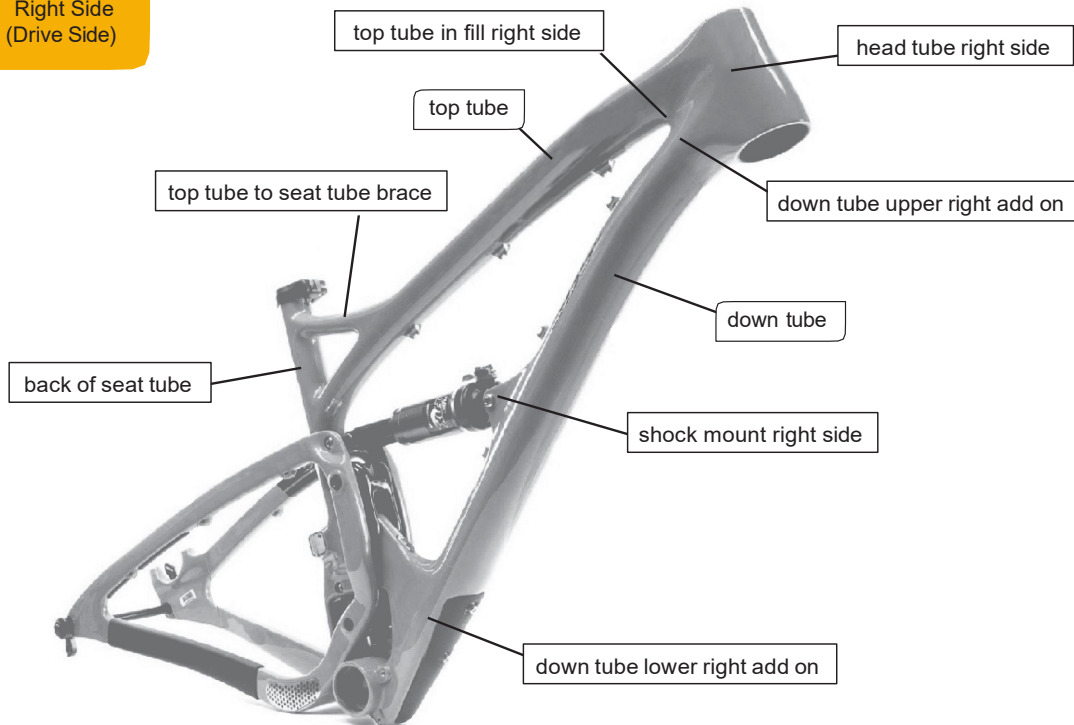

**Care and Removal Instructions**

- Use XPEL Care Products to clean and maintain your Bicycle Protection Film
- If you need to remove your Bicycle Protection Film following these steps:
  - Ensure the frame is at room temperature or warmer.
  - Peel a corner of the film slowly and pull the film at 45° angle
  - To remove adhesive residue, use an all purpose degreaser
